SUMMARY

Software Engineer with 2+ years of experience building AI-powered and backend systems using Python, FastAPI, and modern LLM frameworks. Experienced in developing RAG pipelines, workflow automation systems, and scalable APIs using OpenAI, Gemini, LangChain, and AWS. Strong background in backend engineering with exposure to full-stack development using React and Next.js.

EXPERIENCE

Software Engineer

VisibilityStack • Remote • Sept 2025 – Mar 2026

- Built multi-step AI workflows using LangGraph and OpenAI APIs to automate enterprise document processing, reducing manual review time by 60%
- Designed RAG pipelines with vector search and chunking strategies to improve retrieval accuracy across 20k+ internal documents
- Created a content intelligence system that crawls 500+ competitor pages, extracts entities using spaCy, and surfaces SEO gaps with actionable AI-generated recommendations
- Implemented async crawling and processing pipeline with Celery and Redis, handling 10k+ background jobs daily without blocking API responses

Software Development Engineer

Antrika Technology • Noida, India • Feb 2025 – Sept 2025

- Designed and shipped REST APIs using FastAPI that powered product sync, order management, and user workflows across Shopify-integrated storefronts
- Defined versioned API contracts with frontend and product teams, cutting integration bugs by 40% across three release cycles
- Reduced API response latency by 35% through query optimization, indexing, and Redis caching improvements

Backend Engineer

Plutonic Services Pvt. Ltd • Noida, India • Aug 2024 – Jan 2025

- Owned backend modules in Django serving 5k+ daily API requests for internal dashboards and client-facing portals
- Hardened authentication layer with token rotation and input sanitization, passing third-party security audit with zero critical findings
- Automated data ingestion pipeline processing 10k+ records daily with scheduled background jobs and error recovery

Contract Software Developer

Freelance • Remote • Mar 2024 – Aug 2024

- Launched CareerEdge (AI resume optimizer) and PandaUI (React/Next.js component library)
- Managed full project lifecycles for 10+ clients — scoping, development, deployment on AWS/Vercel, and post-launch support

PROJECTS

CareerEdge — AI-Powered Resume Optimization Platform

AI-powered resume optimization platform that analyzes job descriptions, performs keyword matching, and generates ATS-friendly resume improvements using LLMs.

React, TypeScript, FastAPI, OpenAI API, LangChain, AWS, Vercel

AyeFace — Merchant Dashboard

Full-stack platform with rewards, referrals, notifications, and store modules — covering backend, database, Firebase push notifications, and React frontend.

React, Node.js, Firebase, PostgreSQL

PandaUI — React/Next.js Component Library

Open-source React/Next.js component library with reusable UI components, TypeScript support, and customizable Tailwind-based styling.

React, Next.js, TypeScript, Tailwind CSS

SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

AI / LLM: LangChain, LangGraph, OpenAI API, Gemini API, RAG Pipelines, Vector Search, spaCy

Backend: FastAPI, Django, REST APIs, GraphQL, Celery, WebSockets

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Databases: PostgreSQL, MongoDB, Redis, Pinecone (Vector DB)

DevOps: Docker, AWS (EC2, S3, Lambda), CI/CD, Vercel, Git, Nginx

EDUCATION

B.Tech in Computer Science Engineering (AIML) — Inderprastha Engineering College
