PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing and shipping production-grade LLM applications, NLP pipelines, and RAG architectures. Proficient in LangChain, LangGraph, and multiple LLM providers (OpenAI, Gemini, Groq). Strong full-stack foundation spanning FastAPI, Django, React, and Next.js with cloud deployment on AWS. Proven track record of delivering scalable AI products from concept to production.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript
AI / ML	LangChain, LangGraph, spaCy, TensorFlow, PyTorch, OpenAI API, RAG Architectures
Backend	FastAPI, Django, Node.js, REST APIs, GraphQL
Frontend	React, Next.js, Tailwind CSS, HTML, CSS
Databases	PostgreSQL, MongoDB, Redis
DevOps	Docker, AWS (EC2, S3, Lambda), Vercel
Tools	Git, GitHub

PROFESSIONAL EXPERIENCE

- Software Engineer | *VisibilityStack*

Sept 2025 – Mar 2026

 - Architect and build LLM-powered applications using LangChain, LangGraph, and multiple LLM providers (OpenAI, Perplexity, Groq, Gemini) for enterprise clients.
 - Design and implement NLP pipelines with spaCy and RAG-based architectures to enhance data retrieval accuracy and contextual relevance.
 - Develop an entity analysis platform that crawls competitor websites, identifies content and entity gaps, and generates actionable recommendations for content strategy.
- Software Developer Engineer | *Antrika Technology*

Feb 2025 – Sept 2025

 - Built and maintained backend systems using FastAPI, delivering APIs that powered Shopify-integrated applications.
 - Collaborated with cross-functional product teams to define API contracts, ensuring smooth integration and a consistent user experience.
 - Optimized backend performance through database query tuning and caching strategies, improving API response times.
- Backend Engineer | *Plutonic Services Pvt. Ltd*

Aug 2024 – Jan 2025

 - Designed and implemented backend services using Django to power enterprise-grade applications.
 - Created and maintained RESTful APIs to support frontend teams, optimized database interactions, and ensured seamless system integration.
 - Implemented security best practices, including input validation, authentication hardening, and performance optimizations.
- Contract Software Developer

Mar 2024 – Aug 2024

 - Developed and launched CareerEdge, an AI-powered resume optimization platform with ATS keyword analysis, and PandaUI, a modern React/Next.js UI component library.
 - Managed end-to-end project lifecycles from requirements gathering through deployment on AWS and Vercel for multiple clients.
 - Delivered full-stack web applications across diverse domains, handling frontend, backend, and cloud infrastructure.

PROJECTS

- CareerEdge – AI-Powered Resume Optimization Platform

Built a web platform that tailors resumes to align with job descriptions, helping users pass ATS filters. Features include AI-driven keyword analysis, one-click optimization, and multi-profile support.

Technologies: React, TypeScript, FastAPI, OpenAI API, Langchain, AWS, Vercel
- AyeFace – Merchant Dashboard

Developed multiple key modules of the AyeFace consumer-facing platform, including rewards, referrals, store, and advertisement systems. The advertisement system supported both in-app and outreach ad types. Handled the full stack: designed and implemented the backend, managed the database, integrated push notifications via Firebase, and built the frontend in ReactJS. The platform engaged users, incentivized referrals, managed store transactions, and tracked ad performance seamlessly across modules.

Technologies: React, Node.js, Firebase, PostgreSQL

EDUCATION

B.Tech in Computer Science Engineering (AIML) | Inderprastha Engineering College
XII (CBSE) | Kendriya Vidyalaya NFC Vigyan Vihar

ACHIEVEMENTS

- Solved 250+ problems on LeetCode; completed a 100-day continuous coding streak.
- Launched DevilsPlanet e-commerce platform, driving a 40% increase in online sales within two months.
